

# DESIGN AND TECHNOLOGY TEACHER EDUCATION GROUP

The purpose of the Design and Technology Teacher Education Group (DTTEG) is to share 'best' and emerging practice, encourage diverse perspectives and promote the development of D&T education. DTTEG is an unincorporated association. We are a collective comprised of university- and school-based teacher educators, involved with initial teacher education, continuing professional development and postgraduate study. We speak with many voices but are united in our desire to promote the teaching of designing, making and evaluation in primary and secondary school settings.

The DTTEG blog is a forum for exchanging news, ideas and opinions about D&T teacher education. This includes, but is not limited to:

- › D&T teacher education programmes.
- › Subject knowledge enhancement.
- › Recruitment to teacher education programmes.
- › Responding to government policy affecting D&T ITT and CPD.
- › Updates on programme developments.
- › Curriculum matters in teacher education.
- › Resources for the D&T teacher education community.
- › Early career development.

# DESIGN AND TECHNOLOGY TEACHER EDUCATION GROUP

DTTEG will be holding their **inaugural knowledge exchange symposium in June 2025**, in **Birmingham, UK** (date and location to be confirmed). Scan the QR code or type the URL into your browser, below, to complete the expression of interest form and find out more. The ticket price for the event will include a one year subscription for DTTEG, and is subsidised by Liverpool Institute for Research in Education [LIFE].
